## WORK EXPERIENCE

---

**Mv, spol.**

**Jan 2022 – Dec 2023**

Quality Assurance Tester

Bratislava, SK

Assuring that the product meets specified criteria before production release:

- test cases creation, updating and refactoring
- test data set creation
- thorough bug reports for the development team
- bug reproduction
- suggesting expected behavior solutions for better user experience
- in-depth manual end-to-end testing and integration testing
- cooperation with the development and management teams

**Game Tester.gg**

**Oct 2022 – Sep 2023**

Game Tester

Remote

In this role, I tested video games, specifically focusing on UI/UX elements. If any bugs were identified, my responsibility was to document them and, if feasible, replicate the issues for further analysis.

**Schnellecke Logistics**

**Jul 2023 – Dec 2023**

IT Admin, Python Developer

Bratislava, SK

In my role at Schnellecke, I played a crucial role in overseeing and maintaining the smooth operation of a wide range of critical IT systems and hardware. This included managing and optimizing systems essential for efficient logistics and supply chain operations.

I also cooperated in Python programming to streamline and automate a wide range of processes, enhancing efficiency and productivity within the organization while simplifying the daily tasks of the employees.

## EDUCATION

---

**Faculty of Management, Comenius University**

**2017 – 2023**

Bachelor's + Master's

- Bachelor's thesis: "Design of an Automatic Identification System of Employees"
- Master's thesis: "Application of Machine Learning in Analysis of Biometric Data"
